

EasyDrop®

The disposal system EasyDrop® provides simple means to transport/lower e.g. bags of waste from the aircraft cabin quickly, easily, and safely. With wide-bodied aircraft in mind, it was particularly developed to speed up and support the economies of cleaning processes. After spiralling down the chute gently, the goods arrive on the ground without difficulty or damage. The system provides timesaving disposal, as well as intermediate storage, of waste bags from the cabin.

Now EasyDrop® has been adapted to serve the specific needs of A380 cleaning and maintenance. EasyDrop® reaches the upper deck direct, so the A380 interior stairs will stay untouched by any transport or storage of materials, tools, or waste bags. The operator saves on work time, wear and tear of the cabin, and investment in ground support equipment.

CUSTOMER ADVANTAGES

- safe descent and disposal of waste
- simple operation
- fast work sequence
- separate disposal logistics
- waterproof material
- removal box for lowered goods
- chute labelling according to customer's specification possible

Technical data

Platform code		IT 10180DEM
Working height (up to max)	mm	8500
Lifting capacity	kg	200
Diesel engine	kW	14,6
Traction speed (fast) 2 WD / 4 WD	km/h	Diesel = 5/1.2 Electric = 2.6/0.75
Safety traction speed	km/h	0.7
Total weight	kg	4500
Platform size	mm	4000 x 1700
