

Toilet Bleed Air Filter

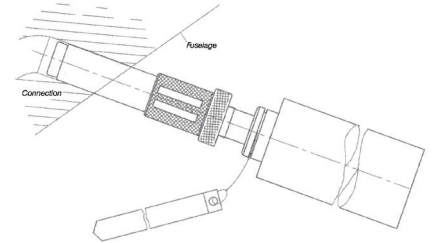

Create a working environment in which mechanics can pay full attention to their jobs, without being distracted by unpleasant odours.

The Toilet Bleed Air Filter developed by Lufthansa LEOS prevents distracting odours from arising during the testing of the vacuum toilets.

To keep your ground time as short as possible, this filter has been designed for quick installation and simple handling.

Once installed to the bleed air tube, the filter remains ready for action for up to 12 months.

Lufthansa LEOS also provides you with the active carbon filter as a spare part.

Customer advantages

- reduced unpleasant odours
- quick installation
- simple handling
- reapplication possible
